Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-40 (Canceled)

41. (Original) A method for identifying a particular caller, said method comprising:
- responsive to detecting a call extended to a destination device, extending a request from said destination device to an origin device requesting a voice utterance of the caller utilizing said origin device;
- identifying, at said destination device, a caller identity associated with said voice utterance, such that a callee receiving said call at said destination device is informed of said caller identity before speaking with said caller;
- sending said caller identity back to an intermediary device processing said call, wherein said intermediary device is enabled to forward said caller identity to said origin device utilized by said caller; and
- receiving a verification of said caller identity from said origin device.
42. (Original) A system for identifying a particular caller, said system comprising:
- a destination telephony device;

AUS920010820US1

means responsive to detecting a call extended to said destination telephony device, for extending a request from said destination telephony device to an origin device requesting a voice utterance of the caller utilizing said origin device;

means for identifying, at said destination telephony device, a caller identity associated with said voice utterance;

means for sending said caller identity back to an intermediary device processing said call, wherein said intermediary device is enabled to forward said caller identity to said origin device utilized by said caller; and

means for receiving a verification of said caller identity from said origin device.
